Adobe PostScript software version: 3011.104		
		~

Step1:

Start Adobe Acrobat Distiller 5.0 and locate the pull down menu next to «Job Options» The default setting is set at «screen» This setting must be changed before creating your PDF files!

Step2:

Scroll down the pull-down menu and find «Press»

4

Step 4 - Additional settings:

Go to the «Settings» pull-down menu located at the top of the screen and select «Job Options…»

icenicsoft - Job Options	×
General Compression Fonts Color Advanced	
Color Images Bicubic Downsampling to for images above: 450 dpi Compression: Automatic Quality: Maximum	OK Save <u>A</u> s Cancel
Grayscale Images Bicubic Downsampling to	
for images above: 450 dpi ✓ Compression: Automatic ▼ Quality: Maximum ▼	
Monochrome Images Bicubic Downsampling to 1200 dpi	
for images above: 1800 dpi Compression: CCITT Group 4	
<u>Anti-Alias to gray:</u> 4 bit <u> </u> Compress <u>T</u> ext and Line Art	

Step 6:

Next select the tab called [Compression] and copy the settings as shown in diagram #6. These settings

will save the resolution of your images!
